LUBRICANTS
PRODUCT DATA SHEET

Tier One Lubricants™ Power-Tac

Product Description

Tier One Lubricants™ Power-Tac oil is a very tacky, tough, pitch dissolving lubricant made from high viscosity base oils having the desired flow and pump-ability properties to assure adequate lubrication over a wide range of ambient temperatures. It is compounded with a special tackiness additive to enhance its performance in any chain lubrication application. It reduces the friction and “throw off oils” at high speeds.

Applications

Tier One Lubricants™ Power-Tac oil is designed to meet the needs of the forest products industries under the adverse operating conditions. It is recommended for all types of chain saw mechanical parts, automatic oilers systems for the chain and bar and sprockets.

Typical Properties*

	Test	Power-Tac
Pour Point, Min °C	D2270	+10
Flash Point, Min °C	D92	400
Tackyness		Pass

*The values shown here are representative of current production. Some are controlled by manufacturing specifications while others are not. All of them may vary within modest ranges.
